

2. Cerrar PgAdmin y buscar el archivo odoo.conf (archivo de configuración de Odoo), hacer una captura del mismo y explicar brevemente el contenido de los siguientes campos:

A screenshot of a text editor window titled 'odoo: Bloc de notas'. The window contains the contents of the 'odoo.conf' file. The file is a configuration file for Odoo, listing various settings such as database connection details, logging, and security. The settings are organized into sections like '[options]', '[addons_path]', and '[security]'. The file is located at 'C:\Program Files\Odoo 17.0.20240919\server\odoo\addons\odoo.conf'.

```

admin_passwd	Es la contraseña maestra del usuario administrador del servidor Odoo.
addons_path	Es una lista separada por coma de las rutas de directorios donde se encuentran los módulos de Odoo y donde se podrían añadir módulos de terceros.
db_host	Define el número de host donde esta la base de datos.
db_port	Define el número de puerto que se utiliza para conectarse a la base de datos.
db_user	Es el nombre del usuario del servidor PosgresSQL.
db_password	Es la contraseña del usuario del servidor PosgresSQL.
